

MUGILAN S

SOFTWARE ENGINEER

Karaikudi | +91 8903215065 | mugi.developer@gmail.com | mugilan.dev
linkedin.com/in/mugilan-developer | github.com/Mugiro45-code

Results-driven Software Engineer with hands-on experience in developing and deploying scalable business applications across healthcare, billing, CRM, inventory management, and enterprise workflow systems. Skilled in building full-stack solutions using Python FastAPI, Laravel, React, PostgreSQL, and MySQL, with strong exposure to production deployments, dynamic backend architectures, and workflow-driven systems. Proven ability to collaborate with cross-functional teams, manage client requirements, and deliver reliable software solutions in fast-paced environments. Recognized for leadership, problem-solving, and effective communication through national-level programs, NGO leadership initiatives, and real-world project contributions. Passionate about continuous learning, backend engineering, DevOps practices, and building impactful technology solutions.

AREA OF EXPERTISE

Frontend

React.js, Next.js, React Native, Bootstrap

Backend

Python FastAPI, PHP Laravel

Database

PostgreSQL, MySQL

DevOps & Deployment

Docker, CI/CD, VPS Deployment, Linux Server Management

Tools & Platforms

Git, GitHub, Figma, Canva

KEY ACHIEVEMENTS

- Developed and deployed multiple production-grade software solutions including Hospital Management Systems, Billing Platforms, CRM Systems, and Inventory Management Applications for real-world business operations.
- Engineered scalable backend workflows and dynamic module architectures using FastAPI, Laravel, PostgreSQL, and React, improving customization and operational efficiency for clients.
- Received the Best Performer Award for outstanding contribution, problem-solving, and collaboration in software development and deployment activities.
- Selected as one of only 10 representatives from Tamil Nadu for the NSS National Integration Camp conducted by the Government of India.
- Honored with the Changemaker of the Year 2025–2026 award at Bhumi for impactful leadership, volunteer management, and community development initiatives.
- Represented Alagappa University in the Youth Parliament Scheme organized by the Ministry of Parliamentary Affairs for three consecutive years.

PROFESSIONAL EXPERIENCE

May 2025 - Present

Software Engineer, Selten Technologies

- Designed, developed, and maintained production-grade enterprise applications including HMS, CRM, Billing, Inventory Management, and E-Commerce platforms.
- Engineered scalable backend systems using Python FastAPI, Laravel, PostgreSQL, and MySQL, focusing on performance, modularity, and business workflow automation.
- Built dynamic CRUD-based architectures and customizable modules to support flexible enterprise application requirements.
- Managed client requirements, testing workflows, deployment activities, and feature enhancements across multiple live business applications.
- Leveraged AI-assisted development and debugging techniques to improve development efficiency and accelerate issue resolution.
- Recognized with the Best Performer Award for technical contribution, teamwork, and problem-solving capabilities.

EDUCATION

Master of Science in Information Technology

Alagappa University – Distance Education
| 2025 - Present

Bachelor of Vocation in Software Development

Alagappa University | 2022 - 2025

- Overall CGPA: 8.21 / 10.0 (82.1%)
- Core Software Engineering CGPA: 8.29 / 10.0
- Coursework: Data Structures & Algorithms, Python Programming, Java Programming, Mobile App Development, Advanced Web Technologies

PROJECTS

Selten ONE - Hospital Management System

Tech Stack : Next.js, Python FastAPI, PostgreSQL

- Developed a scalable Hospital Management System (HMS) featuring a dynamic module builder for configurable workflows and customizable field management.
- Engineered relationship-driven data handling systems supporting appointments, patient records, OP/IP workflows, reports, and hospital operations management.
- Built a workflow-based Notification Hub with automated event-driven triggers to streamline operational communication processes.
- Optimized backend workflows and deployment pipelines within a live VPS-hosted production environment serving real hospital clients.
- Contributed to resolving complex relational data challenges and improving system flexibility for enterprise healthcare requirements.

Billing & Inventory Management Software

Tech Stack : React.js, Laravel, MySQL

- Developed a customized billing and inventory management platform with role-based access control, analytical dashboards, and GST-compliant reporting functionalities.
- Implemented stock management, purchase and sales billing workflows, product administration, and daily operational reporting systems for real-time business tracking.
- Designed user-friendly interfaces and backend workflows optimized for high-volume business operations and client-specific customization requirements.
- Solved complex stock management and inventory synchronization challenges through close collaboration with stakeholders and iterative business logic improvements.
- Deployed the application in a live production environment supporting businesses handling high-volume daily and monthly sales operations.

CERTIFICATIONS

- MERN Stack Development Internship - Bluecode Solutions (2024 - 2025)
- JavaScript Bootcamp - LetsUpgrade (2024)
- Git & GitHub Essentials - LetsUpgrade (2024)
- Online Internship - NoviTech R&D Pvt Ltd (2024)

LEADERSHIP & ACHIEVEMENTS

- Changemaker of the Year 2025–2026 - Bhumi
- Zone President - Bhumi Tiruchirappalli
- NSS National Integration Camp Representative - Government of India
- Youth Parliament Delegate (3 Consecutive Years) - Ministry of Youth and Parliamentary Affairs
- State Adventure Camp Representative - Government of Tamil Nadu
- Best Performer Award - Selten Technologies
